DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 31, 2005 has been entered.

Claim Objections

2. Claims 12 – 15, 18 – 20 and 23 – 28 are objected to because of the following informalities: Line 14 of claim 12 recites the limitation, “said cavity.” There is no antecedent basis for this limitation in the claim. Line 16 of claim 23 recites the same limitation. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 12 – 15, 18 – 20 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 recites the limitation, “a molding compound for insertion into said cavity...to fill **only** the first distance” (emphasis added). The claim also requires “a plurality of Integrated Circuit devices spaced a third distance apart.” The intended

Art Unit: 2811

scope of the claim is difficult to determine since the relationship with the molding compound and the third distance is vague. The specification seems to disclose that the molding compound also fills the third distance, which is prohibited by claim 12.

Line 4 of claim 25 requires that the second distance is perpendicular to the first distance. The scope of the claim is vague since it uses language used to refer to a length (distance) in conjunction with language typically used to describe a direction or orientation (perpendicular). Should the line read "and --extends in a direction-- perpendicular to --a direction-- the first distance --extends--?"

Line 5 of claim 25 requires that the molding compound extend past the second distance. Line 7 of claim 25 requires that the molding compound extend only to the second distance. The scope of the claim is vague, since it has limitations that are contrary to each other.

Response to Arguments

5. Applicant's arguments with respect to claims 12 – 15, 18 – 20 and 25 have been considered but are moot in view of the new ground(s) of rejection.
